

Annual Listing of Projects with Federal Funding for Federal Fiscal Year 2017

December 2017

**San Joaquin Council of Governments
555 E Weber Ave, Stockton, CA 95202
Phone: 209-235-0600
Fax: 209-235-0438
Website: www.sjcog.org**

Purpose

On December 4, 2015, the President signed the Fixing America's Surface Transportation (FAST) Act, the federal surface transportation authorization bill. A requirement within the law, 23 Code of Federal Regulations, Title 23 Part 450.334 requires MPOs to develop listings of projects (including investments in pedestrian walkways and bicycle transportation facilities) for which federal funds were obligated in the preceding program year within 90 calendar days following the end of the program year. These listings shall be published or otherwise made available in accordance with MPO's public participation plan for the FTIP. Specifically:

An Annual Listing of projects, including investments in pedestrian walkways and bicycle transportation facilities, for which federal funds have been obligated in the preceding program year shall be published or otherwise made available by the cooperative effort of the state, transit operator, and metropolitan planning organization for public review. This listing shall be consistent with the funding categories identified in each metropolitan transportation improvement program.

This report is published in response to the above requirement by listing all federally funded transportation projects in the San Joaquin Council of Governments region that were obligated during the federal fiscal year 2017. Obligation refers to the federal government's commitment to pay or reimburse the lead agency for the federal share of a project's cost. Obligation does not indicate expenditure or project completion; only that the project has been approved for federal reimbursement. Programmed project costs can be found in the corresponding Federal Transportation Improvement Program and Regional Transportation Plan.

Background

In 1973, San Joaquin Council of Governments (SJCOG) was recognized as the Regional Transportation Planning Agency for San Joaquin County. Initially the designation related solely to the administration and allocation of Transportation Development Act funds for public transit and possible road and street projects. However over time the role has expanded. SJCOG now serves as the agency responsible for adopting a Regional Transportation Plan, a Regional Transportation Improvement Program, and a Federal Transportation Improvement Program. It is also designated as a Transportation Management area and carries out Congestion Management functions. SJCOG serves as the Airport Land Use Commission, the State Designated Data Center and accesses the Regional Housing Needs Allocation for the county.

SJCOG fosters intergovernmental communication and coordination, undertakes comprehensive regional planning with an emphasis on transportation, provides for citizen involvement in the planning process and supplies technical services to its member governments.

In all these areas the SJCOG serves as a consensus builder to develop an acceptable approach on how to handle problems that do not respect political boundaries.

Who are the members, their representatives, and how do they vote?

SJCOG is a Joint Powers Authority comprised of the County of San Joaquin and the Cities of Escalon, Lathrop, Lodi, Manteca, Ripon, Stockton, and Tracy. SJCOG serves as the regional transportation planning agency and a technical and informational resource for these jurisdictions.

The SJCOG Board of Directors is composed of mayors, council members, and a county supervisor from each of the region's seven cities and the county. Supplementing these voting members are advisory representatives from Caltrans District 10, San Joaquin Regional Transit District, and the Port of Stockton.

SJCOG committees provide opportunities for involvement in regional programs by citizens, elected officials, agency staff, and representatives of civic and community groups. Some are standing committees responsible for policy direction and review, while others are established on an ad hoc basis to assist with specific projects. Standing committees are listed below.

Social Services Transportation Advisory Committee (SSTAC) The purpose of the SSTAC is to monitor and promote improvements to those public transportation services for persons with disabilities and seniors residing in San Joaquin County.

Management and Financial Advisory Committee (MFAC) The Management and Financial Advisory Committee guides administrative and financial decisions of SJCOG as the Local Transportation Authority and is composed of City Managers and the County Administrator.

Habitat Technical Advisory Committee (HTAC) The Habitat Technical Advisory Committee (HTAC) is comprised of 15 stakeholders in the San Joaquin County Multi-Species Habitat Conservation and Open Space Plan (SJMSCP). The HTAC is responsible for verifying that the SJMSCP is being implemented correctly and for solving any issues that arise during implementation.

Citizens Advisory Committee (CAC) The Citizens Advisory Committee provides community input on project priorities and other matters pertaining to the Measure K program. Committee members are appointed by the SJCOG Board and represent the geographical, social, cultural, and economic mix of the region.

Technical Advisory Committee (TAC) The Technical Advisory Committee serves as SJCOG's technical advisory committee and is composed of Directors from the area Public Works Departments, Planning Departments, Caltrans' District 10, the Stockton Metropolitan Transit District, the Air Pollution Control District, and any other agency the Authority so names.

Executive Committee The Executive Committee is made up of five SJCOG Board members and generally reviews selected agenda items and submits a recommendation to the COG Board.

Interagency Transit Committee (ITC) The Interagency Transit Committee (ITC) was created in August 2004 by the San Joaquin Council of Governments Board of Directors to improve communication and coordination among the transit agencies within the San Joaquin County.

The Regional Transportation Plan

The Regional Transportation Plan (RTP) is a long-range (minimum 20-year) plan that provides a vision for future transportation improvements and investments based on specific transportation goals, objectives, policies, and strategies. The RTP is based on federal transportation law requiring comprehensive, cooperative, and continuous transportation planning. SJCOG satisfies these requirements by developing comprehensive transportation plans that include all surface transportation modes (multi-modal planning), to ensure efficient people and goods movements throughout the region.

The purpose of the RTP is to provide strategic direction for transportation capital investments by assessing regional growth and economic trends. Thus, the RTP helps planners link transportation investments to provide a cohesive, balanced and multimodal transportation system that will help relieve traffic congestion, improve safety and provide for economic development.

The Federal Transportation Improvement Program

As the designated metropolitan planning organization for the region, SJCOG prepares and maintains the Federal Transportation Improvement Program (FTIP). The program includes a listing of all transportation-related projects requiring federal funding or other approval by the federal transportation agencies. The FTIP also lists non-federal, regionally significant projects for information and air quality modeling purposes.

Projects included in the FTIP are consistent with SJCOG Regional Transportation Plan and are part of the area's overall strategy for providing mobility, congestion relief and reduction of transportation-related air pollution in support of efforts to attain federal air quality standards for the region.

Public Involvement

SJCOG aims to proactively engage the public in the regional transportation planning process and embrace federal requirements that MPOs provide the public with complete information, timely public notice, full public access to key decisions, and early and continuing involvement in developing the FTIP, Regional Transportation Plan, and other products.

Annual Listing of Projects with Federal Funding for Federal Fiscal Year 2017

Federal law requires SJCOG to publish for public review an annual listing of projects for which federal funds have been obligated in the preceding year, as a record of project delivery and a progress report for public information and disclosure.

This report is divided into the funding types administered by the Federal Highway Administration (FHWA) and the Federal Transit Administration (FTA). Projects are listed by *Lead Agency, FTIP Program, Federal ID* and *SJCOG ID*. The *SJCOG ID* number is a unique project identifier used in the FTIP; the category *Total Dollar Amount in FTIP* is included for reference of total project funding. Multiple *Federal IDs* can correspond with one *SJCOG ID*. Note this list includes only federal funds obligated; no state or local funds are reported. The information contained in this report was provided by the California Department of Transportation.
