

**San Joaquin One Voice® Project Request**  
**CUFC - Washington Street Widening**

**Project Summary:**

Funds requested are for preliminary/final design, environmental documentation, and construction. This Critical Urban Freight Corridor (CUFC) project consists of widening Washington Street from 2-4 lanes from 200 feet east of the Navy Drive/Washington Street intersection to 200 feet east of Port Road 13, for a distance of approximately 4,000 feet. The project would improve operations between the Port's east and west complexes, between the East Complex and the regional transportation network, and would accommodate future growth at the Port's East Complex.:

# WASHINGTON STREET WIDENING
