

2022 San Joaquin One Voice® Project Request
Lathrop Road / Interstate 5 Interchange Improvement Project

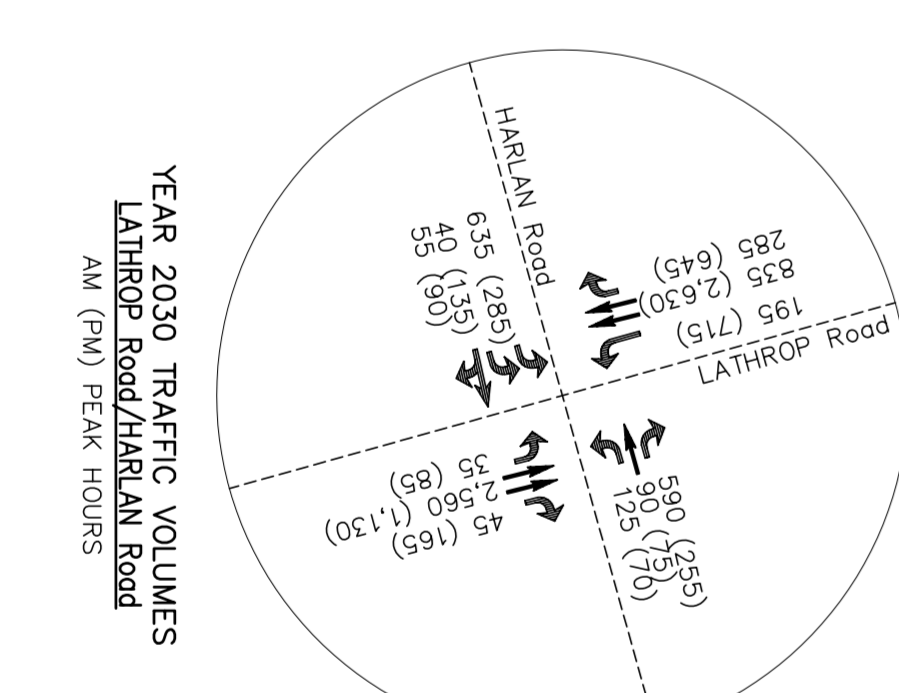

Project Summary:

Regional development has brought the Lathrop Road/Interstate 5 Interchange to its limits. The existing interchange and corridor is heavily used by regional traffic and large trucking complexes subject to backups, delays and accidents. The project would accommodate year 2035 traffic volumes. We are asking for \$5 million of the \$38.3 million total project cost.

We are not asking for funds for development. We are asking for funds to cover the Regional Impacts and the portion we cannot legally require of growth.

The project would widen Lathrop Road to three through lanes in each direction. New loop onramps to I-5 would be constructed, for both northbound and southbound traffic. Off ramps would be widened, with new signalized intersections. Retaining walls would be constructed to accommodate the roadway widening. Auxiliary lanes would be constructed on I-5 in both directions. The interchange will be designed to accommodate traffic volumes for a forecast year of 2035, in accordance with the Regional Transportation Plan.

The funds requested with this Appropriation will be used to complete the Final Design phase. The City anticipates this work would be completed within 2-3 years of receiving funds.
